Azarya Aria Alfathan

PROFILE

Informatics Engineering fresh graduate with proven experience in Augmented Reality (AR) Development across mobile and web platforms. Proficient in building interactive AR applications using Unity (C#) and WebAR frameworks, coupled with a strong academic foundation in Machine Learning and Artificial Neural Networks. Equipped with Object-Oriented Programming (Java) expertise and Python scripting skills. Fluent in English and fully prepared to relocate to Bandung to develop intelligent, immersive Industry 4.0 XR solutions at CAD INDONESIA.

EDUCATION

High School - SMA Negeri 1 Depok, Depok — **July 2018 - July 2021**

Natural Science

Bachelor - Universitas Brawijaya, Malang — **August 2021 - January 2026**

Informatics Engineering

GPA: 3.23/4.00

INTERNSHIP EXPERIENCE

Akademik Fakultas Ilmu Komputer, Malang — **Malang**

Data Management — **February 2025 - June 2025**

Managed student file and data, implementing data visualization to derive actionable insights while assisting academic staff with document administration at the Faculty of Computer Science, Universitas Brawijaya.

ORGANIZATION

SOSLING KSE UB, Malang — **October 2023 - October 2025**

Staff

Coordinated and executed social outreach programs and environmental initiatives within the community.

RISTEK KSE UB, Malang — **October 2021 - October 2023**

Staff

Contributed to the planning and execution of research-based and technology-focused work programs.

Informatics Engineering Student Association, Malang — **October 2021 - December 2021**

Junior Staff

Served in the Fundraising Division, responsible for planning initiatives to generate funds for organizational activities.

IT Club, Depok — **July 2019 - July 2020**

Vice Chairman

Assisted in leading the organization and oversaw the execution of technology-related workshops and extracurricular activities.

ROHIS, Depok — **July 2018 - July 2020**

Staff

Participated in organizing religious events and spiritual development programs for students.

PASKIBRA, Depok — **July 2018 - July 2020**

Staff

Active member participating in discipline training and executing ceremonial flag-raising events.

PERSONAL INFO

Place/Date of Birth
Depok / 26 July 2003

Gender
Male

Nationality
Indonesia

CONTACT

Jalan Pepaya 1 No. 55 Kota Depok

SKILLS

- AR Development (Unity & WebAR) - Proficient
- C# Programming - Intermediate
- Java Programming - Proficient
- Python Programming - Intermediate
- Machine Learning & Neural Network - Basic
- Git (Version Control) - Intermediate
- HTML - Proficient
- CSS & Bootstrap - Proficient
- Tableau - Proficient

LANGUAGE

Indonesian
Native

English
Upper Intermediate

CERTIFICATES

1. **Java (Basic)**
2. **Intro to UI/UX**
3. **CSS Essentials**
4. **ElevAIte with Dicoding Program**
5. **Participants of AI Webinar Series**
6. **Quality Assurance Engineer: Cypress Dari Awal Sampai Mahir**
7. **Pemrograman Web Automation dengan Python dan Selenium**

PROJECTS

1. **Keris Visualization (Final Project)**
   Developed a dynamic, multi-user Web-based Augmented Reality (WebAR) platform designed specifically for the Tosan Aji (traditional Indonesian heirloom) enthusiast community. This project addresses the need for an accessible visualization tool by allowing collectors to upload and manage their own 3D models and markers directly through a web interface without requiring a dedicated app installation. Built using Laravel for the backend management system, and integrated with MindAR and A-Frame for the AR experience, the platform empowers users to digitize and showcase cultural heritage assets interactively. The system was validated through usability testing using the HARUS method, achieving a usability score of 74.7, indicating strong user acceptance and ease of use.

2. **EcoRanger**
   Developed 'EcoRanger', an interactive environmental-awareness mobile AR application built with Unity and C# that features a gamified system where users earn reward points by moving virtual plastic bottle objects toward a designated trash bin. This project involved implementing complex interactive logic through C# scripting, including proximity detection and real-time UI scoring updates, while ensuring seamless 3D asset integration to deliver a stable and immersive user experience.

For proof of certificate and projects, please see the portfolio.
